1 PROFESSIONAL SUMMARY

Systems Analyst with a degree in Systems Analysis and Development and hands-on project experience across AWS Cloud, serverless computing, Infrastructure as Code, information security, and Generative AI. Practical project experience includes AWS Lambda, Amazon S3, Step Functions, CloudFormation, IAM, CloudWatch, CloudTrail, Python, Linux, Kali Linux, and authentication testing in controlled laboratory environments. Analytical, detail-oriented, and organized, with a strong focus on continuous learning, problem-solving, automation, and the practical application of technology.

2 CORE SKILLS

Cloud and Infrastructure: AWS Cloud, Lambda, S3, Step Functions, CloudFormation, IAM, CloudWatch, CloudTrail, Infrastructure as Code.

Information Security: Information Security, Kali Linux, Linux, authentication testing, security and encryption simulations.

Software Development: Python, JavaScript, HTML5, CSS3, Git.

Artificial Intelligence and Tools: Generative AI, ChatGPT, GitHub Copilot, Leonardo AI, ElevenLabs, CapCut.

Data and Other Tools: Power BI, databases, Figma, VS Code, GitHub.

3 PROJECT EXPERIENCE

3.1 AWS Lambda + Amazon S3

Hands-on serverless automation project developed as part of the Santander Code Girls AWS 2025 Bootcamp. Demonstrates integration between AWS Lambda and Amazon S3 with IAM. Technologies: AWS Lambda; Amazon S3; IAM. Repository: github.com/FS-MyCodePath/AWS_Lambda_S3_Automatizado

3.2 AWS Step Functions

Hands-on workflow orchestration project developed as part of the Santander Code Girls AWS 2025 Bootcamp, using AWS Step Functions and Lambda to create and orchestrate workflows. Technologies: AWS Step Functions; AWS Lambda. Repository: github.com/FS-MyCodePath/AWS_WorkFlows_Step_Function

3.3 AWS CloudFormation Stack

Infrastructure as Code project developed as part of the Santander Code Girls AWS 2025 Bootcamp, using AWS CloudFormation to provision resources automatically. Technologies: AWS CloudFormation; IAM. Repository: github.com/FS-MyCodePath/AWS_CloudFormation_Stack

3.4 Python Encryption and Security Simulation

Educational security project developed in a controlled environment to explore encryption, security, and threat-analysis concepts. Technologies: Python; Information Security. Repository: github.com/FS-MyCodePath/Cybersecurity_Python-lab

3.5 Kali Linux and Medusa Attack Simulation

Cybersecurity laboratory project developed as part of the Santander Cybersecurity 2025 Bootcamp, focused on offensive security concepts and authentication testing. Technologies: Kali Linux; Medusa; Linux. Repository: github.com/FS-MyCodePath/Cybersecurity_Kali-Linux_Medusa-lab

3.6 Cloudtrix — Generative AI and AWS

Technology content project using Generative AI to create educational material about AWS Cloud for beginners, including scripting, AI-generated narration, and content editing. Technologies: ChatGPT; ElevenLabs; CapCut; Generative AI. Repository: github.com/FS-MyCodePath/PodCast_IA-Generativa

4 EDUCATION

Bachelor's Degree in Systems Analysis and Development — UNISUAM. Completed 2025.

Technical Degree in Electronics — FAETEC ETEVM. Completed 2018.

Technical High School in Information Technology — Colégio Presidente Kennedy. Completed 2013.

5 PROFESSIONAL EXPERIENCE

Office Assistant — Hermes S/A | March 2015 - April 2016

Provided administrative and office support, including customer service, information organization and data updates, Excel-based activities, credit analysis, and report preparation, contributing to the company's daily administrative and operational activities.

6 CERTIFICATIONS AND TRAINING

- AWS Certified Cloud Practitioner.
- Santander Code Girls 2025 — AWS Cloud.
- Santander Cybersecurity 2025.
- Universia Bootcamp — Generative AI Fundamentals.
- The Complete Web Development Bootcamp — Udemy.
- English Course — Udemy.

7 ADDITIONAL INFORMATION

Languages: English — advanced; Spanish — basic.

Professional interests: AWS Cloud, cloud infrastructure, information security, Generative AI, automation, and technology solutions.
